

Namma Kavacham AI helps citizens check suspicious messages, links and other possible scams, and look up government schemes against official sources. A few interface strings are still shown in English to Santali and Manipuri users. Earlier machine translations of these strings were not usable, so we are asking qualified speakers to write them. Nothing on this sheet has been translated or reviewed yet.

How to fill in this sheet

- Write in the script named for your section: **OI Chiki** for Santali, **Meetei Mayek** for Manipuri.
 - Keep the meaning of the English, not its word order.
 - Use plain, natural wording that ordinary citizens understand.
 - Keep product names and identifiers exactly as written (for example **Namma Kavacham AI**).
- If the English is ambiguous, write your question next to it instead of guessing.
 - Add a correction or short explanation wherever it helps.
 - If you are unsure of a translation, leave it blank until it is clarified.
 - The key (for example `safety.startCheck`) is for developers; you do not need to translate it.

1. Santali

ᱥᱟᱱᱛᱟᱲ · code sat · script: OI Chiki

#	KEY	ENGLISH SOURCE	SANTALI TRANSLATION (OI CHIKI)
1	civic.aiTranslatedNotice	Some interface text is AI-translated and may need human review.	
2	safety.heroTitle	Understand the risk before you act. Page headline.	
3	safety.startCheck	Start a check This is a short button label. Translate it naturally for a user starting a safety assessment.	
4	safety.footerText	Namma Kavacham AI is an advisory risk-assessment tool built with deterministic checks and curated references. It does not replace law enforcement or official helpline services. Keep "Namma Kavacham AI" exactly as written.	

2. Manipuri

ᱠᱤᱨᱤᱰᱤᱦ · code mni · script: Meetei Mayek

Row 5 is a page headline; row 6 is a short button label. Please use natural, understandable wording suited to a citizen-facing safety application.

#	KEY	ENGLISH SOURCE	MANIPURI TRANSLATION (MEETEI MAYEK)
5	safety.heroTitle	Understand the risk before you act. Page headline.	
6	safety.startCheck	Start a check Short button label.	

3. Manipuri — review of an existing navigation label

Current label: `civic.navAsk` — “Ask / Verify” (the menu item where a citizen asks about a government scheme and has the claim checked against official sources).

Current Manipuri text: ᱠᱤᱨᱤᱰᱤᱦ / ᱤᱨᱤᱰᱤᱦ

Does this wording correctly communicate “Ask / Verify” in this context? Please tick one.

☐ Keep the existing wording.

☐ Recommend a correction: _____

Intended meaning of your correction: _____

4. Translator information and consent

one block per translator

Translation language: ☐ Santali ☐ Manipuri
